It has come to our attention that the conversation around management of the DAO's treasury has become highly fragmented. There are numerous entities involved in the conversation at this point, which is made evident by Gauntlet and Karpatkey's recent <u>proposal</u> to manage a portion of the treasury and Avantgarde's attempt at establishing a paid treasury oversight <u>council</u>. <u>@Pepperoni_Jo3</u> and <u>@thedevanshmehta</u> have also been involved in some of these conversations, and Entropy was also contacted by other service providers asking questions on the matter.

In order to align on the optimal path forward, we believe it is critical to start by getting everyone involved on the same page. Therefore, we are suggesting a working group call to take place this week on Thursday September 12th at 1pm ET. Based on conversations that have taken place over the past week (both on the forum and Telegram), Entropy will look to facilitate this process further.
