Events

There is one important event that exists in the ICQ module, which is emitted after any action that happened to a registered Interchain Query:

- EventTypeNeutronMessage
-
  - "neutron"

EventTypeNeutronMessage

Attribute Key Attribute Value module interchainqueries action action identifier:query_updated orquery_removed query_id {identifier_of_registered_query} connection_id {connection_id_for_query} owner {query_owner} Note: is only presented inquery_updated action type {query_type} Note: only presented inquery_updated action tx_filter {transactions_search_filter} Note: only presented inquery_updated action kv_key {kv_keys} Note: only presented inquery_updated action
