In the [original proposal](#) for the GMX referral program, Tier 3 affiliates are able to receive an additional 5% of the trading fee in the form of esGMX. And these esGMX, according to the design,

will not have any requirements for vesting, it can just be deposited into the vesting vault to be converted into GMX over 365 days.

However, as a recipient of these rewards, I've noticed that there's no option to vest my esGMX in the interface. Upon discussing with the developer, it became clear that this isn't due to an interface bug; rather, the feature simply hasn't been implemented yet. Does the team have any plans to implement this functionality? Could we possibly add a feature enabling us to vest our esGMX?
