Application Ports

The docker images expose the following ports:

- 3000
- Grafana. Your main dashboard. Default login is admin\admin.
- 9090
- Prometheus. Access to this port should be restricted.
- 9100
- Node Exporter. Access to this port should be restricted.
- Your secret node metrics on port26660
- should also be restricted.
-

If you followed the basic security guide, these ports are already restricted. You will need to allow the grafana port:

sudo ufw allow 3000

You can also allow access from a specific IP if desired:

sudo ufw allow from 123.123.123.123 to any port 3000
