Hi all - Duncan from [Boardroom](#) here

Part of Boardroom's mission is to increase informed participation in governance. As a project supporting Uniswap we thought it would be useful to provide a weekly recap of recent governance activity in the Uniswap community.

Unlike the [UNI Letter](#) (which stopped shipping in May), this recap will focus exclusively on governance, similar to our coverage of [Optimism governance](#). We believe this will be useful for delegates and voters due to the sometimes rapid pace of governance news and updates. When appropriate we'll also note a few specific areas for action on timely subjects.

Within our weekly recap, we'll provide a look back at:

- Proposals

- Governance changes

- Impactful operating suggestions, and

- Critical governance-related discussions across Discourse, Twitter, and Discord

The first recap will be posted today. We'd love to hear your feedback and any suggestions you might have. Feel free to DM to set up a time to chat!
