Now that 2024 is underway, we're looking back at the strides we've made at dYdX Operations subDAO. It's been a year of significant growth, from legal restructuring to successfully incorporating DOS for enhanced operational efficiency. Our commitment to assisting validators and providing user support has remained unwavering.

We navigated challenges and celebrated milestones, such as the genesis of the dYdX Chain, the rollout of our frontend interface, and further improvement of the community-owned infrastructure.

The journey will continue in the current year, focusing on mobile applications and further infrastructure resilience. We appreciate every contribution from the community and look forward to another year of shared success.
