This is a very long overdue thread, but I am finally making my own delegate communication thread. This same post may also be used to post delegate communication from the SNX Ambassadors.

I'm a longtime DeFi user, governance contributor, committee member, and councilor.

Most of my views are hyperfocused on the growth of DeFi, yield-generating assets, and finding new ways to support DeFi developers onchain.

My most prominent wallets are:

vote.optimism.io

mattlosquadro.eth on Agora

See what mattlosquadro.eth believes and how they vote on Optimism governance.

vote.optimism.io

mattgov.eth on Agora

See what mattgov.eth believes and how they vote on Optimism governance.

& Synthetix Ambassador Wallets (which I am elected to by Synthetix Stakers and am a 1/5 voting member of)

https://vote.optimism.io/delegates/opsnxambassadors.eth

vote.optimism.io

snxambassadors.eth on Agora

See what snxambassadors.eth believes and how they vote on Optimism governance.

Conflict of Interest Statement:

- I'm a Core Contributor at Synthetix and an elected member of the Synthetix Ambassadors Council (the external governance arm) through the Ambassadors

- I am also a councilor at Kwenta/TLX/and, most likely, some future ecosystem projects through the SNX Ambassadors.

- Due to this, I support many Synthetix ecosystem projects through external governance at OP/Arbitrum/et (this includes, but is not limited to, Kwenta, Lyra, Pyth, Polynomial, TLX, Toros/dHEDGE, Infinex, etc.) I am a longtime DeFi nerd, so I love these projects!

- I'm an elected member of Pyth Network for the Pythian Council & support external governance. A longtime lover of Pyth feeds from SNX.

- OP Grants Councillor/Delegate/Citizen/etc & ARB Delegate

Anyway, my main goal here is to provide more clarity and reasoning for why I vote a certain way and also to clarify the SNX Ambassadors' involvement in OP governance.

Thanks all, and apologies that it took this long.
