Hello,

i was on the DYDX Discord, but i'm no longer on it, and not able to join.

My discord handler is: albttx#4242

, i am running the validator nysa.network

My guess is that i'm no longer in any group, i think i was removed from the group testnet or something like that. Could you please check.

When i try to join using my account i have "Whoops, unable to accept invite"
