How to use ASI Alliance Wallet

Feature 1 - Home Screen

When a user opens the web extension for the first time, they are presented with theAccount Dashboard .

Let's explore the Dashboard features below.

Account Dashboard Features

Network Selector Option

By clicking onNetwork Selector button located in the top left corner, the user can change the network.

- On openingNetwork Selector
- , user gets a list of networks from which they can choose.
- They also have 2 tabsCosmos
- andEVM

- to select from.

- User can use theShow testnet

- switch to show or hide testnets.

- User can even enable/disable the networks they want to have in the list.

- For that user can navigate toManage Networks

- page.

- User can toggle to enable or disable the network.

Copy Address

By clicking onthe area marked below the user can copy their account's address.

Three Dots (More Options)

By clicking on these 3 dots button, user will see the following options to manage their wallet:

Add New Account

This option allows the user toAdd a new wallet , as described earlier.

Change Account

If the user has multiple accounts, they can switch across them using this functionality.

Rename Account

This function enables users to change the name of their account.

Delete Wallet

This functionality provides the option to delete a wallet.

User can also backup their mnemonic seed of account before deleting it by clicking on Back up mnemonic seed.

Viewing Account Information

Current Balance

The user can see theirCurrent Balance inSelected Network's token and in USD.

Portfolio

By clicking on theView Portfolio button, users can view their portfolio's stats, performance and composition.

Here user will have 2 tabs:Tokens andStats .

By clicking onToken tab, users have the ability to explore the tokens page.

- Users will be able to see price graph at different timelines but also performReceive
- orSend
- operations by clicking on token boxes.

On the other hand, theStats tab displays the staking information, includingAvailable tokens for staking,Staked tokens andStaking rewards accrued.

Portfolio Performance

In the home screen of the Wallet, users can track their portfolio performance over various timeframes (from 24 hours to 1 year).
