We'll begin hosting SUAVE Office Hours next week 2024-08-14T16:00:00Z

.

1. [Join the call here](#) if you're keen.

2. See all future calls happening on [the Flashbots Calendar](#).

SUAVE Office Hours aims to spotlight developers so that we can understand together how to build better SUAPPs, providing a comprehensive walkthrough of working with SUAVE while discussing tradeoffs and design constraints. On the way we will be discussing SUAVE idioms and design patterns to build a common understanding, generate content and tutorials for SUAPP development, and demonstrate the process by building SUAPPs live.

Next week will be a special edition hosted by [@dmarz](#) who has some exciting news to share and a few awesome demos to unveil. It's not to be missed.

We look forward to working in the open as a community in order to create the kinds of SUAPPs that we all need to continue illuminating, democratizing and distributing the value created on and with the shared protocols we use.
