See title – I got conned by a phishing link last night and had my Metamask account wiped by a drainer wallet (I think).

They withdrew a small amount of AVAX tokens I used for transactions from the wallet, but also drained the erc20 avUSDC I had related to my AAVE supply on the AVAX marketplace.

What can the hacker do with the avUSDC they have from my wallet now? Can these funds be recovered?

my (compromised) address: 0xf641C20f92DB7EFfe736E2b26979afa061a98305
