Demos

[Scaffolding](#)

Starter application repository with code demos.

[Wormhole Examples](#)

More example components. Has a mix of relayers, cross chain applications, NFT projects, and more.

[Basic Examples](#)

Several example projects are bundled here. They show minimum-code examples for how to send messages, tokens, and other common functions.

[Native USDC Bridging](#)

An example demonstrating integration of Circle's Cross-Chain Transfer Protocol using Wormhole.

[Reference Bridge UI](#)

An example GUI which can be used to perform token transfers around the ecosystem.

[Borrow Lend](#)

Examples of a cross chain borrow lend protocol.
