Last week a GOV12.1.2 bootstrapping edit was approved that paved the way for very impactful short term changes.
GOV12.1.2 bootstrapping edit proposal

However there was an oversight in the edit as it failed to modify the maximum fee for arrangers, which is necessary to set up basis trade strategies.

To fix this issue im proposing a follow up edit as candidate for a GOV12.1.2 bootstrapping edit proposal that will fix this issue and allow short term exposure to basis trade strategies.

The Stability Scope edit follows in the replies

As mentioned in the last post I am working in parallel on a more comprehensive MIP102 Atlas edit that will fix the lack of flexibility in the Atlas and clean up the complexity not needed for short term execution.
