Hey everyone, I'm excited to share that we are opening up Nominations for the GMX Security Committee. The [initial post](#) provides more information about the role. Interested candidates can submit their nominations below this post, using the provided template.

**Compensation:**

Members of the Security committee will receive an honorarium for their activities on behalf of GMX. The proposed honorarium is $500 per month. Nominees from Labs will waive receipt of this honorarium as they are already indirectly compensated and aligned with the GMX DAO through contributor agreements.

The Nomination period will open for about three weeks from 15 August to around 5 September. Following this, we will have a one-week Snapshot vote to decide the members of the Security Committee.

Interested candidates, please submit your nominations below this post based on the provided template.

**Nomination Template:**

Name:

Twitter Account:

Github link:

Can you read and write code:

Relevant Experience: Please share any links and supporting information.

Familiarity with GMX DAO: How well do you know GMX and DAO governance in general?

Suggestions for the GMX Security Committee: Do you have any ideas or suggestions for how the GMX Security Committee can maximise its impact?

Time Commitment: Can you commit at least 5 hours per week to serve as part of this council?

Declaration of Conflict of Interest (if any):
