Hello.

I failed in Secret Finance (Bridge) sScrt → wScrt transfer 3 days ago.

–The following is the error display content–

Transfer failed!

For more information

https: //chat.scrt.network

Please access #

bridge-support and specify the operation ID.

The transaction IDs are: 3f95695f-8291-4b12-9896-4f488a5b52fd

–End of display–

I want to know two points

① When searching for a public server, the Discord server of [#

bridge-support] was not found.

② I want to find out by myself from [transaction ID], but I don't know where it can be used.

I think this is a rudimentary question, but can you tell me?

Thank you.
