I've created a separate post about the issue with leaderboard returns

[Feature request/bug report: Calculate leaderboard returns considering the payout factor](/c/feedback/2)[

Feedback

](/c/feedback/2)

I noticed that it doesn't look like the returns on the leaderboard are taking into consideration the payout factor. I discovered this as I wrote a notebook to do the calculations for myself and noticed I get different numbers to the leaderboard unless I override the payout factor as 1 for all rounds. I'm assuming not including it was just an accident as the payout factor is pretty new, but I think it's pretty important to include it in the calculations for the transparency of the tournament. Mor…
