I am proposing the following scope contents as content for a GOV12.1.2 bootstrapping edit in order to prepare for the Launch Season of the Endgame Features.

I will put the practical edits to the Stability and Governance Scopes in the replies to this post.

It is still a work in progress, and I will make edits to the Scope contents. I will also need help from the community to look for any contradictions or inconsistencies that can be fixed. I will aim to make the final edit Friday March 15th.
