Hi. I tried to change my validator withdrawal address on Allnodes to the EigonPod address I set up, but I don't think I did this correctly and was confused by it all. There was no place to change this on Allnodes that I could find and I only had 20 or so minutes to do this (the alloted time Allnodes allows once I decided to change the Allnodes address). I instead changed my recipient fee address using the EigonPod address I generated, but I don't see any of the ETH there now while the staked ETH node on Allnodes is no longer there. I don't see my ETH in my Ledger wallet either, so at this point I don't know where the ETH is and it appears lost. I sent a message to Allnodes too about this. I desparately hope I did not lose my 32 ETH as well as the awards. Any advice would be appreciated.
