I am glad to share a new addition to the SCRT Labs.

We're pleased to welcome [Bohdan Chikh](#) to the team. Bohdan brings experience from Huawei's distributed learning team and has also developed a high-frequency crypto trading system for Wincent - a market making company.

Bohdan holds a BA in Computer Science and an MA in Applied Mathematics from Lviv National University. He's also accomplished in competitive programming, has strong skills in Rust and C++, and catching up on Go .

Bohdan will be working with the team on the development of Secret Network core.

Bohdan's academic credentials, his experience with newest tech and his competitive programming background make him a great addition to the team.

He is quickly getting up to speed and is already providing meaningful contribution.

Please join me in welcoming him to the Secret family.
