Proposal Summary

- The purpose of this post is to apply for canonical Uniswap V3 deployment on Cyber

- All of the Uni v3 contracts have already been deployed

- No further actions need to be taken by the DAO

About Cyber

Cyber is a Layer 2 blockchain designed for social applications on the OP Superchain. Its mission is to enable the creation of new onchain experiences and enhance existing ones through social features. Cyber aims to expand web3 beyond finance and attract new users to web3 by simplifying UX and making onchain interactions more meaningful.

Some highlights:

1. One of the most active L2s among OP Superchain, with 1.5M total addresses and 1.38 TPS

2. Surpassed 30M transactions since launching to mainnet in May

3. Products built on Cyber include Link3 (100k MAU), XO (70-100k DAU), Phi and 100 more ecosystem apps

4. Cyber's Social Summer (socialsummer.xyz) campaign highlighting the OP Superchain led to 3M+ NFT mints from 160k+ users

Proposal Stakeholders

Proposer: Cyber

Deployer: Reservoir

Frontend: Reservoir (launching soon)

Bridge Provider: Canonical

Target Chain: Cyber

Deployment Details

As is the case with all official v3 deployments, this deployment is governed by the Uniswap DAO via Cyber's native bridge. The factory is owned by the CrossChainAccount contract, which forwards message from the UNI Timelock contract on Ethereum. Per the governance process, the UAC will review the deployment and update the text record to include the Cyber deployment.
