Aztec: A Privacy-First L2 on Ethereum

On Ethereum today, everything is publicly visible, by everyone. In the real world, people enjoy privacy. Aztec brings privacy to Ethereum.

Get started

Learn

Start on the [Technical Overview page](#) to read about how Aztec works.

Build

Go to the [Getting Started section](#) of the developer docs to get your hands dirty and start developing on Aztec.

Go deeper

Check out the [Awesome Aztec repo](#) for a curated list of learning resources and tools to help you learn more about Aztec.

Clone the [Aztec Starter repo](#) to get a minimal project set up with Sandbox (local developer network), a simple contract and a test suite.

Jump into one of the [tutorials](#) to learn how to build more complex applications on Aztec. [Edit this page](#)
