System data

Use the mcd:systemData service to look up system-wide parameters. In the code, this is called SystemDataService .

```
Copy const service = maker.service('mcd:systemData');
```

Instance methods

getAnnualBaseRate()

Returns the base rate applied to all collateral types, in addition to their individual risk premiums.

```
Copy const base = await service.getAnnualBaseRate();
```

getSystemWideDebtCeiling()

Returns the debt ceiling for the entire system.

```
Copy const line = await service.getSystemWideDebtCeiling();
```

isGlobalSettlementInvoked()

Returns a boolean that is true if emergency shutdown has been triggered.

```
Copy const dead = await service.isGlobalSettlementInvoked();
```
