Web3-Onboard

The simplest way to have users connect their wallet to your dapp, preview their transactions, and receive real-time notifications. Web3 Onboard is an open-source, framework agnostic JavaScript library that helps dapp users easily connect their wallet of choice.

Web3 Onboard has:

- agnostic framework
- multi-wallet and multi-chain functionality with one-library
- minimal dependencies
- real-time transaction notifications
- transaction preview
- automatic, custom UX matching
-
