The PoW Solution on Namada

ð° The link to the faucet is [https://faucet.heliax.click(opens in a new tab)](https://faucet.heliax.click) As of v0.23.1 , the Namada faucet has been moved to be an API call to a server. In order to request tokens, a proof of work challenge must be completed, in order to prevent spamming of the faucet.

â ï¸ Note that this is not included in Mainnet as it is circumstantial to testnet. Since [fees are paid by implicit accounts](), it is recommended to source NAM to one of these accounts as the first step. Afterwards, using the --gas-payer flag, you can specify the address of the implicit account to pay for the transaction.
