Build and Test Osmosis Source Code

Install Go 1.18

Currently, Osmosis uses Go 1.18 to compile the code.

Install[Go 1.18](#) by following instructions there.

Verify the installation by typinggo version in your terminal.

go version go version go1.18.1 darwin/amd64

Build Osmosis

In order to build Osmosis you need the source code. Either[download the source of a release](#)or[clone the git repository](#) .

Build Osmosis from the source code:

cd osmosis make build After building, you should see a new executable fileosmosis/build/osmosisd .

Run Tests

Run tests from the source code:

cd osmosis make test [Edit this page](#) [Previous Introduction](#) [Next Osmosis CLI](#) * [Install Go 1.18](#) * [Build Osmosis](#) * [Run Tests](#)
