As per the official source (ApeCoin) these are the wallets which consists of our DAOs treasury.

About 60 of the 100 wallets listed over here has already been discarded and as this list hasn't been updated in quite a while, due to which it has become long obsolete.

Some of the tools I was using for onchain intelligence were tracking the outdated list so they had a vastly different idea of our treasury and its balance.

Will also include a Dune dashboard for easier following.

Without access to the internal documentation and people responsible for the operations of the treasury, this information is accurate to the best of my knowledge. As I've done this already for Apecoin Tracker, so It's only fair if I make this information public so that other users can look into it if they want.

Keeping that information might've been

@br00no does this classify as a bootleg audit ? or a fake one ?

This took a lot of time and effort so I hope this helps

Keep in mind this wallet list excludes the wallets and staking balances which amount to somewhere around 50 million $APE.

I hope this helps, will add to this to reflect changes made periodically
