Login with AWS CLI

use aws configure in the cli to connect your account for Terraform deployment. You will be prompted to enter the following. See [Creating a Secret Key Pair](#) for more information.

- AWS Access Key ID: <your_access_key_id
-
- AWS Secret Access Key: <your_secret_access_key
-
- Default region name:us-east-1
- Use this, as Terraform has known issues with other regions
- Default output format: json
