ERC721Proxy

Derives

- ImmutableOwner

Functions

constructor

function

constructor (address _immutableOwner)

public

Parameters:

Name Type Description _immutableOwner address

func_60iHVgK

function

func_60iHVgK (address

from , address to , uint256

, uint256 tokenId , contract

IERC721 token)

external Proxy transfer method forIERC721.transferFrom . Selector must matchIERC20.transferFrom . Note thatamount is unused for security reasons to prevent unintended ERC-721 token sale via partial fill

Parameters:

Name Type Description from address to address `` uint256 tokenId uint256 token contract IERC721[Edit this page](Edit this page) [Previous ERC1155Proxy](ERC1155Proxy) [Next ERC721ProxySafe](ERC721ProxySafe)
