Hello community,

I think the 4% criteria makes some sense, so that the whales cannot skew the system by making multiple wallets.

I recommend a more community driven approach to solve this issue by opening delegation option to vote 'yes' to reach quorum, with an added option of having a threshold of at least 1600 UNI tokens. That is 0.004 % of 4% criteria that is in place.

This will in turn bring more power to the community and would be less discriminatory.

Regards,

Bhaskar
