Function Types

Information about quoteLayerZero function types. Function types are used to by [quoteLayerZeroFee()](#) to get the cross chain message fee.

For standard a Stargateswap() , use function type =1

```
```

Copy // all function types uint8 public constantTYPE_SWAP_REMOTE=1; uint8 public constantTYPE_ADD_LIQUIDITY=2; uint8 public constantTYPE_REDEEM_LOCAL_CALL_BACK=3; uint8 public constantTYPE_WITHDRAW_REMOTE=4;

```
```

Each of the above types corresponds to a function within Stargate that sends a cross chain message.

- Type 1: Used forswap()
- Type 2: Used foraddLiquidity()
- Type 3: Used for the B->A portion of an A->B->AwithdrawLocal()
- Type 4: Use to initiate awithdrawLocal()
