ERC-20 Paymaster

Pimlico's ERC-20 Paymaster is an on-chain ERC-4337 paymaster that is able to pay for the gas fees of your users in exchange for ERC-20 tokens.

Pimlico is proud to have launched the first permissionless, fully-audited ERC20 Paymaster

Tutorials

Learning-oriented lessons that take you through a series of steps to complete a project. Most useful when you want to get started with Pimlico. They all involve the Alto Bundler.

- [Tutorial 3](#)
- leverages the ERC-20 Paymaster to sponsor the gas fees for a User Operation with USDC.

References

References provide specific technical descriptions. They are most useful when you need detailed information about Pimlico's APIs.
