Install secretd

Unlike other Tendermint/Cosmos based daemons,secretd cannot be built from source due to the SGX requirement. For other builds other than.deb , see the[Secret Network Github Releases](#) .

Download, Verify and Installsecretd

The most common method for installsecretd is the Secret Network package installer for Debian/Ubuntu:
```

Copy

# download secretd v1.12

wget"https://github.com/scrtlabs/SecretNetwork/releases/download/v1.12.0-beta.8/secretnetwork_1.12.0-beta.8_testnet_goleveldb_amd64.deb"

# Verify the v1.12 binaries

echo'10bd6edf4425041bfaaf43df3741b8a81151a707249b4714f521f8abc56776d1 secretnetwork_1.12.0-beta.8_testnet_goleveldb_amd64.deb'|sha256sum--check

# Install v1.12 binaries

sudoaptinstall-y"./secretnetwork_1.12.0-beta.8_testnet_goleveldb_amd64.deb"

# verify installation

secretdversion

# 1.12.0-beta.8

```
