About Us

Curia Lab is a team of seasoned DAO governance researchers, data analysts, blockchain engineers, and developers. We are committed to strengthening the DAO ecosystem through specialized tools, insights, and delegate services.

Our Goal for Uniswap

Curia Lab aligns with Uniswap's vision of an open, efficient, and decentralized financial system. Our goal is to leverage our experience in data-driven governance to support Uniswap's core values. We aim to enhance Uniswap's decision-making, transparency, and progressive decentralization. Our commitment to fostering innovation, ensuring user protection, and promoting financial inclusion will help Uniswap achieve sustained growth and maintain its leadership as a top DEX.

Disclosure

As a team deeply involved in governance research and DAO operations, we engage with various projects and DAOs such as Optimism, Safe, Arbitrum, Gnosis, etc. to improve their governance. We pledge to maintain transparency and manage any potential conflicts of interest responsibly, especially in our dealings with Uniswap and its community.

Waiver of Liability

By delegating to Curia for Uniswap governance, delegators acknowledge that Curia will participate on a best-effort basis and will not be liable for any damages related to this participation.
