gm all!

I am thoroughly enjoying diving down the rabbit (Ape) hole (omg not sure ape hole comes out in the same way!)

Is there a single point of reference to navigate the multitude of information, meeting/spaces timings, sub communities, Dapps and websites associated with ApeCoin DAO?

For example I know ApeComms are doing some great work, but to find them I went to Twitter and searched for them after reading about them on Discourse. I jumped onto a great twitter spaces yesterday because I happened to see it while on twitter. I love using Discourse and the live conversations work well, but to see the conclusions of these conversations seems to be a case of searching through the AIPs chat history.

It would be super useful to have a single point that can aid in finding the right places to go, like a public calendar of all calls, a depository of all the links that lead to useful information, for example where to find geographically defined Ape groups? Summaries of the AIPs implemented rather than digging through the discussion thread as another example.

If this exists please point me towards it, if it doesn't I would love to help create it!
