minEthSaleAmount()

```
Copy functionminEthSaleAmount()externalviewreturns(uint128);
```

This function returns the minium amount of ETH that can be in the account balance before triggering a top up and price update.

Once ETH sale amount is below this value, it will top-up to the max (or remaining balance) and reset the price to x2 last sale price

Example

```
Copy minEthSaleAmount() returns( 10000000000000000000;//indicating 10 ETH in wei )
```
