I've been in BAYC from May 1st 2021 and in the beginning there was an ape directory created with contact infor twitter handle etc. Since that time the community has exponentially grown to an unfathomable scale and I imagine 100's of businesses, licenses , other utilization of side projects have been created.

I would like to have a community based spreadsheet so that the resources of the community can be used to support other community members and #apesupportape

is there a database of any such thing in existence or a way we can pull together to bring us together as a community , cross pollinate and even simply be introduced to the members beyond twitter and support projects in flegling stages to have contact aor resources to help us build IP in BAYV MAYC OTHERSIDE and Beyond?

Open to suggestions and hope to meet some new apes in the process.
