I have been looking at the options from traditional established players such as Slack or Teams to more web3 software. If community members have experience using some of the tools/platforms below, make a comment with feedback.

Core

1. Discord - calls, townhalls, chat, content distribution, file transfer

2. Notion - program management, project management

3. Slack

4. Dework - web3 tool

5. JIRA - [Jira | Issue & Project Tracking Software | Atlassian](#)

6. Discourse - the current forum

Communication only

1. Zoom - voice call, video calls.

2. Google Meet - voice call, video calls.

3. Telegram - voice call, video calls. Also content distribution.

4. Signal - voice call, video calls.

5. Teams

6. WhatsApp business

Filesharing

1. Discord

2. Telegram (encrypted)

Working docs

1. Google Docs

2. Email

Meeting/Scheduling

1. Calendly

2. Notion just released a desktop software for calendar. Works well integrates with google which can integrate with Calendly.

HR

1. Coordinape - web3 tool - pay contributors

Finance

1. Gnosis/Safe - web3 tool

2. Liquidity Pools - web3 tool

3. Actual 3rd party invesments (0ther tools or contracts)

Social Media

1. Twitter

2. Tiktok

3. Instagram

4. Discourse

3rd party media

1. AppComms
2. BoredGazette
3. TBC

"Needs further research."

1.Monday

1. Wecom - Wechat Work
2. asana.com
3. Trello
4. DingTalk

We will get a matrix together as this is just a simple view.

Also specific tools for DAOs, many are listed here:

DeepDAO

DeepDAO

Discovery, listing and analytics for all DAOs

Examples:

togethercrew.com

[TogetherCrew - Build a Strong Community and Become Unstoppable](#)

TogetherCrew tool analyzes your community data and provides insights and recommendations. Unlock your venture's growth!
