The Uniswap DAO has seen a large influx of delegates and community participants over the past couple of months. DAO-led programs have also increased in quantity. Unfortunately, many of these proposals and conversations can get lost in the swath of forum posts, making it difficult to keep track of what's important and timely. It also takes some time for new entrants to become familiar with the DAO's existing initiatives. To increase clarity around monthly DAO occurrences, we are resuming governance community calls, now led by the Uniswap Accountability Committee (UAC).

These calls will be hosted using Google Meets on the second Tuesday of every month, from 10am – 11am Eastern Time. You may refer to this calendar to keep track of meeting dates and links.

Note that these community calls are hosted by the DAO and are separate from the Uniswap Foundation's calls.

This forum thread will provide updates and reminders regarding the monthly calls. We will be recording each of the meetings and tracking the attendance for delegates that are a part of the delegate reward program.

If you are ever interested in covering a particular proposal or discussion point regarding Uniswap governance in general, please feel free to reach out. Our team will collect a list of relevant topics for each call and contact authors of currently active proposals to ensure that they have a chance to directly interact with the community and fairly present their thoughts. The format of these calls will be a combination of quick, successive presentations from a couple of community members, followed by a live Q&A/discussion.
