About Us

Hello Arbitrum community! 404 DAO is Atlanta's City DAO. We are a community of web3 professionals and students focused on advancing education, innovation, and adoption of blockchain technology in Atlanta. Our governance team is composed of Georgia Tech graduates, Atlanta professionals, and current Georgia Tech students. More information about our team, organization, and voting profiles can be found on our Governance Page.

In addition to our governance work, 404 DAO is the host of Web3 ATL, Atlanta's largest web3 conference, and is the team behind the 404 Accelerator.

Delegate Statement

The goal of the Arbitrum DAO is to facilitate the success of the Arbitrum network. We believe the DAO should prioritize the following objectives in the support of the aforementioned goal:

- Ensure the critical infrastructure and technical mechanisms are developed to enhance user experience, security, and decentralization.

- Support the existing projects and protocols that contributed to Arbitrum's initial success while also incentivizing new users to build on the protocol.

- Take a conservative approach to incentivize activity. We believe that implementing thoughtful and well-detailed requirements for grants and incentive programs is crucial to ensuring Arbitrum doesn't become reliant on subsidized activity.

Skills and Areas of Expertise:

Our team encompasses a wide range of both technical and non-technical backgrounds. These range from analytics and business development to cybersecurity and MEV. The 404 DAO governance team is composed primarily of current and former Georgia Tech students with a wide range of degrees including: Computer Science, Data Science, Business, Finance, Cybersecurity that makes us uniquely able to apply expertise in a wide range of interdisciplinary challenges.

Disclosure of Conflicts of Interest:

404 DAO is also an active delegate in the Optimism DAO and Uniswap DAO. When necessary, we will also disclose other conflicts of interest and at times abstain from voting.
