Dashboard

The Biconomy dashboard is your gateway to accessing our services such as Paymaster, Bundlers, and allows you to retrieve your API keys for usage with our SDK and API. Additionally, this is where you can top up and configure your Paymasters for sponsoring transactions.

info Please note that this documentation refers to our Account Abstraction SDK solution. If you need information about the EOA gasless dashboard please refer to these [docs](#)

Login

The Biconomy Dashboard can be found at [dashboard.biconomy.io/](#) . Several sign in options are available including Email, Github, and Gitlab.

Paymaster Keys

Paymaster keys can be found on the Overview page of the paymasters. You can copy your Paymaster API Key as well as your Paymaster URL as shown below

Bundler URL

Our Bundler as a service is coming soon but for now you can use the following URL for your bundler package:

[https://bundler.biconomy.io/api/v2/{chain-id-here}/nJPK7B3ru.dd7f7861-190d-41bd-af80-6877f74b8f44](#) For a Bundler URL on mainnet, please contact [us](#) .

In the following sections, we will more systematically introduce the following concepts:

Create a Paymaster Add Paymaster ## Paymaster Rules For a paymaster, you can restrict the sponsorship to only needed. If no contract is whitelisted, then paymaster will facilitate all the contract interactions. ## Spending Limits This feature allows you the gas usage. You can define global limits or per-user quotas, specifying either transaction count or total gas consumption. ## Organizat organization feature is designed to enhance collaboration and streamline team management within your workspace. ## APIs Using these to perform various actions without the need to access the dashboard UI manually.
