Optimism alignment:

[Dope Wars](#) is an open metaverse project with a "Play To Own" model, where we envision multiple games and digital environments in our future ecosystem. Dope Wars DAO is run by a community of like minded individuals with a collective determination to striving towards the Dope Wars DAOs vision. In Nov 2021 our first Hustler was initiated from Ethereum mainnet to Optimism network([FLEX Hustler](#)).

Dope Wars decided early on to make Optimism network the home of our ecosystem.

Currently Our open-world 2D MMO (massively multiplayer online) metaverse built on Optimism has one fully completed map for Hustlers to explore, with interiors and more on the way. Hustlers can chat, vibe, and interact with each other on the map while completing quests and playing mini-games. The DOPE MMO metaverse experience will also be the home for launching additional games like entering into the DOPE WARS Game on Starknet.

Proposal for token distribution

Dope Wars is a fork of the Loot protocol with a GTA spin. Our Ethereum mainnet DOPE NFT collection has 9 items(GEAR) associated with each NFT. Users are required to claim/initiate the gear which mints the corresponding items on Optimism network as an ERC-1155. This function can only be called once per DOPE NFT.

These items can then be equipped to a character (HUSTLER) to interact with our Dope Wars games. All Hustlers are fully customizable and free to mint without gear on Optimism, allowing anyone to participate in our MMO metaverse.

For more info please check out [Dope-Wiki](#) & our [GitHub](#).

Dope Wars was a free mint and has had no formal funding, all treasury funds have come from royalties in secondary sales on [OpenSea](#) and [Quixotic](#). Unfortunately we will not be-able to match incentives. We anticipate all incentives to be distributed within 24 months.
