Problem:

Users can only see the "current" total rewards, once he claims or compounds, it resets to zero. Therefore users can't see what they have earned in the past year if the compound regularly.

Solution:

Short and simple: add a line (or maybe a new category with a more detailed breakdown, showing esGMX / ETH rewards, how much GMX and GLP received each etc.) at [gmx.io/earn](gmx.io/earn).

Possible title: Complete rewards (wording can def be improved, I'm not a native speaker).

This is my first proposal, so I hope I didn't do too much wrong.
