United States

Educational Background:

Masters Degree, International Political Economy, Kings College London

Professional Background:

Enterprise Paid Media Manager at NVIDIA. See my LinkedIn profile for more information: https://www.linkedin.com/in/kouroshbehnam/

Nomination Statement

I'm running for the Special Council to be a representative for the ApeCoin community members.

Motivation

My main motivation comes from curiosity and the willingness to be the voice of the ApeCoin community members. I'm a digital marketer and business man at my core and I believe I can bring great value to ApeCoin DAO through my knowledge and network.

Rationale

I entered the crypto space in 2019 with Ethereum. In the Algorand community, I'm most know for spearheading the investments groups in the Goanna discord server. I helped coordinate Goanna owners to collectively taken part in two seed round investment for Algorand projects. Both Wayru and Zestcap DAOs are LLCs to ensure the investments are fully compliant. I also enjoy being a helpful Admin, Goanna Council Member and contributing to the Goanna DAO newsletter.

Specifications

Crypto governance participation includes: ENS and Al Goanna. ApeCoin has been more recent after I discovered the discourse community. Most of my web3 experience is with the Goanna DAO, creating 8 investment groups within the DAO and two LLCs.

Concluding Statement

The combination of my digital marketing, business, and web3 community experiences will help be serve the ApeCoin

community as best as I can.
