Tutorials

Learning-oriented lessons that take you through a series of steps to complete a project. Most useful when you want to get started with Pimlico.

Tutorial 1 takes you through the journey of leveraging permissionless.js's high-level APIs to easily create and bundle a user operation.

Tutorial 2 takes you through the journey of creating a user operation, getting it sponsored by our verifying paymaster, and then sending it to be included on-chain with our bundler.

Tutorial 3 takes you through the journey of sponsoring your first user operation with USDC with an ERC-20 paymaster.
