Migrating from Orion to Tessera

A utility is included in Tessera which enables migration of an Orion configuration file and database to a Tessera configuration file and database for Hyperledger Besu users.

A full migration workflow would be as follows:

1. Download or build the migration utility.
2. Shut down the Orion and Hyperledger Besu nodes.
3. Perform the migration.
4. Start Tessera with the new configuration and database files.
5. Start Hyperledger Besu nodes.

A full tutorial including links to the utility and example code can be found here . Edit this page Last updatedonOct 9, 2023 bydependabot[bot] Previous Migrate Next Multi-tenancy migration
