addLiquidity()

Loan your ERC20 tokens to Stargate and earn fees! addLiquidity() empowers users to earn fees by loaning their ERC20 tokens to the Stargate protocol. It's as easy as callingaddLiquidity().

Heres a description of the arguments:

```
```

Copy functionaddLiquidity(uint _poolId,// the stargate poolId representing the specific ERC20 token uint256 _amountLD,// the amount to loan. quantity in local decimals address _to// the address to receive the LP token. ie: shares of the pool)
