Onchain Proposals

1. [Arbitrum Hackathon Builder Continuation Program](#) (voting starts on 5th Dec, Thursday)

RnDAO proposes to co-fund a phased 6-month program in partnership with Arbitrum DAO to invest in 4 Arbitrum CollabTech Hackathon winners with the aim of taking these projects from a hackathon PoC to MVP.

RnDAO is proposing for Arbitrum DAO to invest $187,980 into the winners, while RnDAO will provide $200,250, and provide weekly hands-on support.

Phase 1 will focus on validating ideas and understanding the market landscape, while Phase 2 will support projects to move from 'PoC' to the development of a market-viable 'MVP' to secure their first users.

2. [Treasury Management V1.2](#) (voting starts on 5th Dec, Thursday)

Entropy Advisors proposes two treasury tracks to tackle treasury management:

Treasury Management (TMC): 10M ARB for ARB-only strategies + 15M ARB converted to stables.

Growth Management (GMC): 7,500 ETH, DAO-approved spending only.

Each track gets a 3-member committee for specialized focus, with funds under the Arbitrum Foundation's custody.

Snapshots⚡

1. [User Research: Why build on Arbitrum?](#) (voting ends on 6th Dec, Friday)

RnDAO is proposing to fund research to understand why builders choose [@arbitrum](#), identify its strengths and weaknesses, and guide future development by interviewing developers and entrepreneurs.

Live interviews will be conducted with diverse builders and competitors' users, guided by a Stakeholder Council including Arbitrum organizations and DAO delegates.

The goal of this proposal is to understand and document builder motivations, preferences, and decision-making processes, which could be used to refine ecosystem growth strategies.

Budget: $38.6k (Arbitrum-only) or $58.4k (includes Solana/Optimism), with a $20k success bonus, delivered in milestones tied to progress and final results.

2. [Designing and operating the reporting and information function](#) (voting ends on 6th Dec, Friday)

The DAO has spent 425M ARB on 40+ initiatives over 18 months, but reporting remains inconsistent, limiting transparency and performance tracking. This proposal aims to establish a Reporting and Information function to improve initiative visibility, transparency, and decision-making for the DAO.

Importance: Reporting is critical for organizational growth, learning, and credibility, addressing gaps in data capture, documentation, and stakeholder communication.

Budget: Up to $263,260 for 12 months (including 4 months backpay), supporting ongoing reporting, community involvement, and research on improving data workflows.
