Here's a description of where we're at, and where we're going, with Salad, our noncustodial mixing service for transaction privacy on Ethereum. https://blog.enigma.co/salad-2020-development-update-a497154385

If you'd like to get involved, we need users to [participate in our survey

](https://airtable.com/shrMztHj8MdolUbFv), and for any developers working with Metamask (especially Snaps!) check out the [issue we've opened.

](https://github.com/MetaMask/metamask-snaps-beta/issues/146)
