Hi, I think if many more tokens and LPs tokens on AMM would be listed use and popularity of Aave would increase. Of course listed tokens or LPs must pass a filter to avoid scam or shitcoins but why not list many tokens and LPs made with one proposal or voting? I think may be to made colaborative list of tokens and LPs to list them would be good, may be allow only tokens with more than 50M$ Market cap.

Lest talk and see what people thinks about it :)
