Context

We are considering opening a proposal to significantly improve Aave's official documentation. Before moving ahead, we would like to gather community feedback on the problem, our proposed solution, and the expected impact. Your insights and suggestions are invaluable to us.

Why is this ARC Necessary?

| Motivation

Aave's documentation serves as the gateway for both developers and users to understand and interact with the ecosystem. However, the current state presents challenges in:

- Navigability due to a sub-optimal structural layout

- Clarity due to ambiguous or unclear explanations

- Credibility due to incorrect or outdated information

[Here you can see multiple examples of deficiencies, broken links, etc](#)

These issues compromise the utility of the documentation and hinder the overall accessibility and growth of the Aave ecosystem. Addressing them aligns with Aave's strategic objectives and offers multiple-fold benefits to the community.

Specification

Objectives and Actions

1. Re-engineering Documentation Structure:

2. Optimize the layout for more intuitive navigation

3. Implement a table of contents and an index for easy reference

4. Optimize the layout for more intuitive navigation

5. Implement a table of contents and an index for easy reference

6. Refining Content:

7. Edit for clarity, precision, and unambiguity

8. Align the language and tone with Aave's ethos

9. Edit for clarity, precision, and unambiguity

10. Align the language and tone with Aave's ethos

11. Updating All Information:

12. Validate all data, links, and guidelines

13. Ensure everything is up to date and accurate

14. Validate all data, links, and guidelines

15. Ensure everything is up to date and accurate

By accomplishing these objectives, this ARC aims to provide a comprehensive solution that significantly enhances the quality of Aave's ecosystem.

Disclaimer

No conflicts of interest or third-party involvement in this proposal. Only the Cryptoversidad Team will be working on this.

Expected Impact

This ARC will:

- Facilitate quicker and more effective developer onboarding

- Simplify the understanding and utilization of Aave for a broader user base

- Enhance Aave's integrity and reputation

We believe this will lead to a much-improved user experience and align closely with the DAO's priorities

Hey @jengajojo, thanks for your question, here I share the details: We are very familiar with Aave's docs, since we have used it extensively to create animated explainer videos of their whole docs, see details here. Same thing with GHO's docs and respective explainer videos. We created 10 animated videos based off the technical documentation of Optimism, see details here. To give you a preview of how we'd approach the Aave documentation improvement, we've prepared a sample. It's an enhanced v…

Next Steps

We invite the community to provide feedback, suggestions, ideas to take this into a ARFC and AIP

We look forward to your valuable feedback, suggestions, and votes.
